To Whom It May Concern:

It is with great pleasure and the highest regard that I recommend Mr. Olson for the position of Associate Professor at Shenandoah Conservatory. I had the honor of being a student of Mr. Olson's while attending Shenandoah University. I honestly believe that Mr. Olson's expertise and teaching ability make him already a pivotal faculty member of the Audio Department of Shenandoah; and his further involvement with the program will greatly benefit the school and the students.

I have met very few people with the same working knowledge as Mr. Olson, when it comes to the techniques and equipment used in the audio industry. I realize now as a working professional, that he not only teaches techniques and ideas that are necessary, but he teaches how to decide when and where to use those techniques. Another great quality of his is that he leads his students by example in his work ethic and enthusiasm for improving himself. He is honestly just a phenomenal teacher and mentor.

Mr. Olson's contributions to Shenandoah Conservatory's MPRT department are already fantastic in their own regard, and I know that any more involvement he has with the school will benefit its students and image. I offer my sincerest recommendation of him for this position. Please feel free to contact me if you have any further questions.

Best Regards,
